## **DETAILED ACTION**

### ***Claim Objections***

Claims 8, 10, and 11 are objected to because of the following informalities:

Applicant had withdrawn Claims 8, 10, and 11 in his response of February 12, 2004.

Therefore, Examiner does not address Claims 8, 10, and 11 in this office action.

Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-7, and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Chang et al (US 5,419,766). Chang et al discloses an apparatus comprising a needle cannula having a distal point, a tip protector having a base, means coupled to the tip protector, a gasket coupled to the tip protector base, means coupled to the needle cannula shaft impeding movement of the tip protector, a flash chamber, a tab, a crimp (Figures 2c, 6a-6c).

### ***Response to Arguments***

Applicant's arguments filed on 09/13/2004 have been fully considered but they are not persuasive. Applicant amends Claim 1 to recite, "fixedly coupled....at a predetermined location..." and contends that Chang does not disclose this new limitation. Examiner notes that there is no disclosure in the specification of "fixedly connected." Therefore, Applicant is adding new matter to the instant application. Nonetheless, at a particular point in the invention of Chang, the means is "fixedly coupled" to the needle cannula shaft.
